

RETHINKING ASSET MONITORING

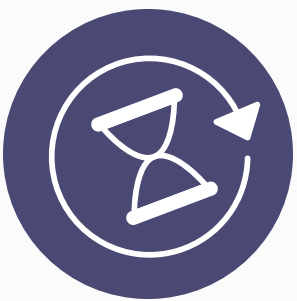

Ubiquitous Sensing

COMPANIES WITH A LARGE INSTALLED BASE OF ASSETS FACE A COUPLE OF KEY CHALLENGES

LACK OF VISIBILITY

Companies often find it difficult to track how well their assets are being utilized, making it hard to predict maintenance needs.

DOWNTIME

Outages can be very expensive, especially if they are unplanned or come with no advanced warnings

STOKE MAKES IT SIMPLE FOR COMPANIES TO MONITOR INDUSTRIAL ASSETS IN REAL TIME

By tracking the usage and condition of equipment in real-time, companies can predict when maintenance might be required, preventing downtime and improving operational efficiency.

INTRODUCING SMARTEGE

EDGE AI

SmartEdge sensors convert asset data into insights

UBIQUITOUS CONNECTIVITY

Monitor assets, regardless of where they are located

3-YEAR BATTERY LIFE

Years of hassle-free monitoring
