SmartEdge™

SmartEdge™ is the only truly plug-and-play solution for monitoring the condition of industrial assets.

Monitoring as a service

- *SmartEdge™ devices have a 3-year battery life and can be installed easily on any asset*
- *Stoke's patent-pending Edge AI algorithms run on the devices and convert raw sensor data into actionable insights*
- *Stoke's strategic partnerships with telecom companies ensures real-time visibility and global coverage*

**Installs in 20 seconds.
Then pays for itself.**

How it works

1. Identify an asset to monitor

SmartEdge™ can monitor the condition of assets such as engines, motors, compressors, pumps, HVAC systems and conveyors.

2. Attach the SmartEdge™ device

SmartEdge™ is very easy to install and can usually be done without shutting down the asset.

3. Monitor from anywhere in the world

SmartEdge™ insights are available online 24/7. No additional infrastructure required.

Applications

ASSET UTILIZATION

Monitor remote assets and operate them at peak availability and performance

UPTIME IMPROVEMENT

Analyze an asset's reliability and avoid unplanned shutdowns

PREDICTIVE MAINTENANCE

Use asset health indicators to plan maintenance activities

ASSET OPTIMIZATION

Compare the condition of different assets of the same class

OPEX REDUCTION

Defer unnecessary time-based maintenance and save costs

RISK MANAGEMENT

Identify risky assets, deploy maintenance personnel and manage risk proactively
